

ASCIA 2018 PROGRAM

GP Allergy Update

Saturday 8 September 2018

Menzies Theatre, National Convention Centre, Canberra, Australia

Convenor: Dr Raymond Mullins

Learning Outcomes:

- Identify appropriate treatment options for respiratory allergy and when referral to a clinical immunology/allergy specialist is required.
- Recognise the link between tick allergy and mammalian meat allergy and how to remove ticks to prevent allergic reactions.
- Identify patients with urticaria and angioedema, when to suspect an allergic origin for symptoms, and treatment options including referral to a specialist.
- Develop an understanding of treatment options for food, drug and venom allergy, management of anaphylaxis and when referral to a clinical immunology/allergy specialist is required.
- Develop an understanding of the principles and implementation of the ASCIA Guidelines for infant feeding and allergy prevention.
